## PREFACE

25X1A This Mission Coverage Index (MCI) furnishes a listing of items of intelligence interest covered by aerial photographic material from CHURCH DOOR Mission GRC 146, dated 30 March 1963 [ ]

25X1A [ ] The listing provides the latest description based on photographic interpretation for each target covered by the mission except for those targets in which no significant change was noted. Items in the listing are arranged by WAC area, and within a WAC by coordinates reading from south to north and from west to east. An explanation of column headings and photo reference data used in presenting the information is contained in the appendix.

For convenience of the user, a subject index to the intelligence targets has been included following the listing. Targets in the subject index are listed by category, and within a category alphabetically by place name.

The user of this MCI is cautioned that the scan of photography from Mission GRC 146 was accomplished in a relatively short time and often without the aid of precise analytical and mensural techniques commonly employed in detailed photographic analysis. Consequently, although the information presented herein is essentially accurate, additional, detailed analysis may somewhat alter portions of the information.

Targets of special interest covered by Mission GRC 146 include the Chang-shu Airfield, Chung-ching (Chungking) Complex, Cheng-tu Complex, Te-yang Complex, and the Chung-pa probable iron and steel complex.

EXPLANATION OF COLUMN HEADINGS  
AND PHOTO REFERENCES

Installation Numbers--The Installation Numbers column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since the installation numbers are repeated from WAC to WAC. For example, there is an NPIC target numbered 0493-1 and an NPIC target numbered 0495-1. In each instance, the NPIC installation number is 1, but the installations appear on different WACs.
